Data Declaration

Victims
Sex
by Offense Category, 2011

The FBI collects these data through the FBI UCR Program's NIBRS.

General Comment

This table shows the sex of the victim by the offense category to which they were connected.

Methodology

This table uses the following rules and then aggregates the data by the sex of the victims and offense category:

- Victims – count one for each victim, i.e., Victim Segment, where Data Element 25 (Type of Victim) is I = Individual or L = Law Enforcement Officer for each offense type to which they were connected via Data Element 24 (Victim Connected to UCR Offense Code); in a multiple-offense incident, count a victim for each connected offense type.

- Sex – determine sex by the data value in Data Element 27 (Sex of Victim).
