## Data Declaration

## Table 12

## Crime Trends, by Population Group, 2010-2011

The FBI collects these data through the Uniform Crime Reporting (UCR) Program.

## General comments

- This 2-year trend table provides the number of offenses for 2010 and 2011 and the percent change between these 2 years, listed by population group.
- Metropolitan counties include sheriffs' offices and county law enforcement agencies associated with a Metropolitan Statistical Area (MSA).
- Nonmetropolitan counties include sheriffs' offices and county law enforcement agencies that are not associated with an MSA.
- Suburban areas include law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within an MSA.
- Suburban areas exclude all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

## Methodology

- The data used in creating this table were from all law enforcement agencies submitting at least 6 common months of complete offense reports for 2010 and 2011.
- A crime trend represents the percentage change in crime based on data reported in a prior equivalent period. In calculating trends, the UCR Program includes only common reported months for individual agencies.

## Population groups

The UCR Program uses the following population group designations:

| Population Group | Political Label | Population Range |
| :--- | :--- | :--- |
| I | City | 250,000 and more |
| II | City | 100,000 to 249,999 |
| III | City | 50,000 to 99,999 |
| IV | City | 25,000 to 49,999 |
| V | City | 10,000 to 24,999 |
| VI,2 | City | Less than 10,000 |
| VIII (Nonmetropolitan | County) ${ }^{2}$ | County |

${ }^{1}$ Includes universities and colleges to which no population is attributed.
${ }^{2}$ Includes state police to which no population is attributed.

## Population estimation

The FBI calculated 2011 state growth rates using the U.S. Census Bureau's 2010 decennial state/ national population figures and 2011 provisional state/ national population estimates. The FBI then estimated population figures for city jurisdictions by applying the 2011 state growth rate to the 2010 U.S. Census Bureau data.
