

## Data Declaration

### Table 42

#### Arrests, by Sex, 2011

The FBI collects these data through the Uniform Crime Reporting Program.

#### General comments

- This table provides the number of males and females arrested nationwide in 2011. The table furnishes breakdowns of these data for each offense and supplies a percent distribution of males and females arrested among all offense types.
- These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.

#### Methodology

The data used in creating this table were from all law enforcement agencies submitting 12 months of arrest data for 2011.

#### Population estimation

The FBI calculated 2011 state growth rates using the U.S. Census Bureau's 2010 decennial state/national population figures and 2011 provisional state/national population estimates. The FBI then estimated population figures for city jurisdictions by applying the 2011 state growth rate to the 2010 U.S. Census Bureau data.
