

Data Declaration

Table 72

Full-time Law Enforcement Employees, Range in Rate per 1,000 Inhabitants, by Population Group, 2011

The FBI collects these data through the Uniform Crime Reporting (UCR) Program.

General comments

- This table provides the number of agencies that fall within specified rate ranges of employment by population group for law enforcement personnel, both sworn officers and civilian employees.
- Agencies with no resident population (i.e., those associated with universities and colleges [see Table 79], other agencies [see Table 81], and some state agencies) are excluded from this table. Therefore, the total number of agencies used in this table differs from those provided in other law enforcement employee tables.

Methodology

- The information in this table is derived from law enforcement employee counts (as of October 31, 2011) submitted by participating agencies.
- The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement.
- Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics.
- The FBI derived the rate of full-time law enforcement employees per population group by first dividing the aggregated total of personnel for the group by the

aggregated estimated populations covered by the contributing agencies within the group and then multiplying the resulting figure by 1,000.

Population estimation

The FBI calculated 2011 state growth rates using the U.S. Census Bureau's 2010 decennial state/national population figures and 2011 provisional state/national population estimates. The FBI then estimated population figures for city jurisdictions by applying the 2011 state growth rate to the 2010 U.S. Census Bureau data.
