

Data Declaration

Table 25

Percent of Offenses Cleared by Arrest or Exceptional Means, by Population Group, 2012

The FBI collects these data through the Uniform Crime Reporting (UCR) Program.

General comments

- This table provides the number of violent crimes and property crimes with a breakdown of the offenses known to law enforcement and the percentage of those offenses that were cleared by arrest or exceptional means.
- The number of agencies meeting the criteria for inclusion in this table and the 2012 estimated population for those agencies are provided by city population groups, county population groups, and suburban areas.
- Not all agencies submit data reports for arson to the FBI. Therefore, the agency counts and estimated population presented in this table do not represent participation for the reporting of arson.
- Suburban areas include law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area.
- Suburban areas exclude all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

Methodology

- The data used in creating this table were from all law enforcement agencies submitting at least 6 months of complete offense reports for 2012.

- The FBI bases percent cleared statistics on aggregated offense and clearance totals. The percentage of crimes cleared by arrest is obtained first by dividing the number of offenses cleared by the number of offenses known and then multiplying the resulting figure by 100.

Population groups

The UCR Program uses the following population group designations:

Population Group	Political Label	Population Range
I	City	250,000 and more
II	City	100,000 to 249,999
III	City	50,000 to 99,999
IV	City	25,000 to 49,999
V	City	10,000 to 24,999
VI ^{1, 2}	City	Less than 10,000
VIII (Nonmetropolitan County) ²	County	N/A
IX (Metropolitan County) ²	County	N/A

¹Includes universities and colleges to which no population is attributed.

²Includes state police to which no population is attributed.

Population estimation

The FBI calculated 2012 state growth rates using the U.S. Census Bureau's 2011 and 2012 provisional state/national population estimates. The FBI then estimated

population figures for city and county jurisdictions by applying the 2012 state growth rate to the updated 2011 U.S. Census Bureau data.
