

Data Declaration

Table 54

Arrests, Metropolitan Counties, by Sex, 2012

The FBI collects these data through the Uniform Crime Reporting Program.

General comments

- This table provides the number of males and females arrested in metropolitan counties in 2012. The table furnishes breakdowns of these data for each offense and supplies the percent distribution of males and females arrested among all offense types.
- The Metropolitan Counties classification encompasses jurisdictions covered by noncity law enforcement agencies located within currently designated Metropolitan Statistical Areas. (See Area Definitions.)
- These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.

Methodology

The data used in creating this table were from all metropolitan county law enforcement agencies submitting 12 months of arrest data for 2012.

Population estimation

The FBI calculated 2012 state growth rates using the U.S. Census Bureau's 2011 and 2012 provisional state/national population estimates. The FBI then estimated population figures for city and county jurisdictions by applying the 2012 state growth rate to the updated 2011 U.S. Census Bureau data.
