

## Data Declaration

### Table 71

#### **Full-time Law Enforcement Officers, by Region and Geographic Division by Population Group, Number and Rate per 1,000 Inhabitants, 2012**

The FBI collects these data through the Uniform Crime Reporting (UCR) Program.

#### **General comments**

- This table provides the number and rate per 1,000 inhabitants of sworn law enforcement officers broken down by region, geographic division, and population group.
- The totals for full-time law enforcement officers in metropolitan and nonmetropolitan county agencies are combined in this table.
- Suburban areas include law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area.
- Suburban areas exclude all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

#### **Methodology**

- The information in this table is derived from law enforcement officer counts (as of October 31, 2012) submitted by participating agencies.
- The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from government funds set aside specifically to pay sworn law enforcement.

## **Regions and geographic divisions**

The U.S. Census Bureau has established the four regions of the United States along with their nine geographic divisions that are used by the UCR Program to compile the nation's crime data. The following table lists the 50 states and the District of Columbia arranged according to the regions and geographic divisions of the United States.

### **Population estimation**

The FBI calculated 2012 state growth rates using the U.S. Census Bureau's 2011 and 2012 provisional state/national population estimates. The FBI then estimated population figures for city and county jurisdictions by applying the 2012 state growth rate to the updated 2011 U.S. Census Bureau data.
