

## Offenses Cleared

In the FBI's Uniform Crime Reporting (UCR) Program, law enforcement agencies can clear, or "close," offenses in one of two ways: by arrest or by exceptional means. Although an agency may administratively close a case, that does not necessarily mean that the agency can clear the offense for UCR purposes. To clear an offense within the UCR Program's guidelines, the reporting agency must adhere to certain criteria, which are outlined in the following text. (*Note: The UCR Program does not distinguish between offenses cleared by arrest and those cleared by exceptional means in collecting or publishing data via the traditional Summary Reporting System.*)

### ***Cleared by arrest***

In the UCR Program, a law enforcement agency reports that an offense is cleared by arrest, or solved for crime reporting purposes, when three specific conditions have been met. The three conditions are that at least one person has been:

- Arrested.
- Charged with the commission of the offense.
- Turned over to the court for prosecution (whether following arrest, court summons, or police notice).

In its clearance calculations, the UCR Program counts the number of offenses that are cleared, not the number of persons arrested. The arrest of one person may clear several crimes, and the arrest of many persons may clear only one offense. In addition, some clearances that an agency records in a particular calendar year, such as 2013, may pertain to offenses that occurred in previous years.

### ***Cleared by exceptional means***

In certain situations, elements beyond law enforcement's control prevent the agency from arresting and formally charging the offender. When this occurs, the agency can clear the offense *exceptionally*. Law enforcement agencies must meet the following four conditions in order to clear an offense by exceptional means. The agency must have:

- Identified the offender.
- Gathered enough evidence to support an arrest, make a charge, and turn over the offender to the court for prosecution.
- Identified the offender's exact location so that the suspect could be taken into custody immediately.
- Encountered a circumstance outside the control of law enforcement that prohibits the agency from arresting, charging, and prosecuting the offender.

Examples of exceptional clearances include, but are not limited to, the death of the offender (e.g., suicide or justifiably killed by police or citizen); the victim's refusal to cooperate with the prosecution after the offender has been identified; or the denial of extradition because the offender committed a crime in another jurisdiction and is being prosecuted for that offense. In the UCR Program, the recovery of property alone does not clear an offense.

### ***Clearances involving only persons under 18 years of age***

When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program considers the incident for which the juvenile is being held responsible to be cleared by arrest, even though a physical arrest may not have occurred. When clearances involve both juvenile and adult offenders, those incidents are classified as clearances for crimes committed by adults. Because the clearance percentages for crimes committed by juveniles include only those clearances in which no adults were involved, the figures in this publication should not be used to present a definitive picture of juvenile involvement in crime.

### ***Overview***

- In the nation in 2013, 48.1 percent of violent crimes and 19.7 percent of property crimes were cleared by arrest or exceptional means.
- When considering clearances of violent crimes, 64.1 percent of murder offenses, 40.6 percent of rape offenses (revised definition), 40.0 percent of rape offenses (legacy definition), 29.4 percent of robbery offenses, and 57.7 percent of

aggravated assault offenses were cleared. (Please note, the legacy and revised UCR definitions for rape can be accessed in Offense Definitions.)

- Among property crimes, 22.4 percent of larceny-theft offenses, 14.2 percent of motor vehicle theft offenses, and 13.1 percent of burglary offenses were cleared.
- In 2013, 20.7 percent of arson offenses were cleared by arrest or exceptional means.
- Nearly 28 percent (27.9) of arson offenses cleared involved juveniles (persons under age 18); this was the highest percentage of all offense clearances involving only juveniles.
- Nearly 17 percent (16.9) of rape offenses (revised definition) that were cleared involved juveniles.

### ***Expanded clearance data***

Expanded information regarding clearances for the offenses of rape, robbery, aggravated assault, burglary, motor vehicle theft, and arson may be found in Table 27, “Percent of Offenses Cleared by Arrest or Exceptional Means, Additional Information About Selected Offenses by Population Group, 2013.”

### ***What you won't find on this page***

Arrest data are not on this page. In its calculations, the UCR Program counts the number of offenses that are cleared, not the number of persons arrested.

### ***If you have questions about these data***

For questions about this information or for Web assistance, please contact the FBI's Criminal Justice Information Services Division at (304) 625-2000. For more information about the UCR Master Files from which this publication was derived and other available UCR data, see *UCR Electronic and Hard Copy Data Dissemination Standard Operating Procedures*.
