

Data Declaration

Table 14

Crime Trends, by Metropolitan and Nonmetropolitan Counties by Population Group, 2013-2014

The FBI collects these data through the Uniform Crime Reporting (UCR) Program.

Important note about rape data

In 2013, the FBI UCR Program initiated the collection of rape data under a revised definition and removed the term “forcible” from the offense name. The UCR Program now defines rape as follows:

Rape (revised definition): Penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim. (This includes the offenses of Rape, Sodomy, and Sexual Assault with an Object as converted from data submitted via the National Incident-Based Reporting System [NIBRS]).

Rape (legacy definition): The carnal knowledge of a female forcibly and against her will.

Since the implementation of the revised definition of rape in 2013, not all agencies/state UCR programs have had the ability to change their records management systems to accommodate the change. Therefore, this report provides a column for rape (revised definition) and a column for rape (legacy definition). The data shown in the rape (revised definition) column include those from agencies that reported rape under the UCR revised definition for 2013 and 2014 as well as converted data from agencies that reported data for rape, sodomy, and sexual assault with an object via the NIBRS for both years. The data shown in the rape (legacy definition) column include only those agencies that reported rape under the legacy definition via the Summary Reporting System (SRS) for 2013 and 2014; it does not include any converted NIBRS data.

General comments

- This 2-year trend table provides the number of offenses for 2013 and 2014 and the percent change between these 2 years for metropolitan counties and nonmetropolitan counties.
- Metropolitan counties include sheriffs' offices and county law enforcement agencies associated with a Metropolitan Statistical Area (MSA).
- Nonmetropolitan counties include sheriffs' offices and county law enforcement agencies that are not associated with an MSA.
- Offenses from state police agencies are not included in this table.

Methodology

- The data used in creating this table were from all law enforcement agencies submitting at least 6 common months of complete offense reports for 2013 and 2014. If the FBI determines certain variables have created unusual fluctuations in the data, those data are excluded from the tabulations.
- A crime trend represents the percentage change in crime based on data reported in a prior equivalent period. In calculating trends, the UCR Program includes only common reported months for individual agencies.
- The rape figures for those agencies that changed from reporting rape under the legacy definition in 2013 to the UCR revised definition of rape in 2014 are not included in this table. Because the UCR Program has not received 2 consecutive years of data for rape (legacy definition) or 2 consecutive years of data for rape (revised definition), the national UCR Program cannot provide a 2-year rape comparison for these agencies. This includes 2,796 agencies with a total population of 86,350,657 inhabitants.
- The percent changes shown for the offense of rape (revised definition) are based on data from those agencies that submitted rape data according to the UCR revised definition for both 2013 and 2014 as well as converted data from agencies

that reported data for rape, sodomy, and sexual assault with an object via the NIBRS for both years.

- The percent changes shown for the offense of rape (legacy definition) are based only on data from those agencies that submitted rape data according to the legacy definition via the SRS for both years; it does not include converted NIBRS data.
- Because rape data reported by all agencies for 2013 and 2014 cannot be aggregated for reasons noted above, the percent changes from one year to the next are calculated with smaller numbers than in recent years. Offenses with fewer counts are often sensitive to minor differences when calculating trends. The following table provides the actual number of reporting agencies and populations covered for each definition of rape. (As previously noted, agencies that submitted data using rape [legacy definition] for 2013 and rape [revised definition] for 2014 are not included in this table.)

Populations used to calculate rape rates (based on rape definition used for submitted data)				
by Metropolitan and Nonmetropolitan Counties¹				
by Population Group, 2014				
Population Group	Agencies using the revised UCR rape definition		Agencies using the legacy UCR rape definition	
	Agency count	Population	Agency count	Population
Metropolitan				
Counties 100,000 and over	83	20,456,786	49	12,676,403
25,000 to 99,999	256	12,816,658	123	6,894,407
Under 25,000	756	3,148,813	325	974,476

Nonmetropolitan				
Counties 25,000 and over	154	6,220,548	70	2,700,724
10,000 to 24,999	387	6,232,112	110	1,853,720
Under 10,000	1,001	2,964,660	266	510,684

¹Metropolitan counties include sheriffs and county law enforcement agencies associated with a Metropolitan Statistical Area. Nonmetropolitan counties include sheriffs and county law enforcement agencies that are not associated with a Metropolitan Statistical Area. The offenses from state police agencies are not included in this table.

Population estimation

For the 2014 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2010 decennial population counts and 2011 through 2013 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2013 Census population estimate to derive the agency's 2014 population estimate.
