

Table 2, Data Declaration

January to June 2014-2015 Percent Change, by Region

The FBI collects these data through the Uniform Crime Reporting (UCR) Program.

General comment

This table provides the percent change in offenses known to law enforcement, by region, for the first 6 months of 2014 and 2015.

Important note about rape data

In 2013, the FBI UCR Program initiated the collection of rape data under a revised definition and removed the term “forcible” from the offense name. The UCR Program now defines rape as follows:

Rape (revised definition): Penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim. (This includes the offenses of rape, sodomy, and sexual assault with an object as converted from data submitted via the National Incident-Based Reporting System [NIBRS]).

Rape (legacy definition): The carnal knowledge of a female forcibly and against her will.

Since the implementation of the revised definition of rape in 2013, not all agencies/state UCR programs have had the ability to change their records management systems to accommodate the change. Therefore, this report provides a column for rape (revised definition) and a column for rape (legacy definition). The data shown in the rape (revised definition) column include those from agencies that reported rape under the UCR revised definition for 2014 and 2015 as well as converted data from agencies that reported data for rape, sodomy, and sexual assault with an object via the NIBRS for both years. The data shown in the rape (legacy definition) column include only those agencies

that reported rape under the legacy definition via the Summary Reporting System (SRS) for 2014 and 2015; it does not include any converted NIBRS data.

Methodology

The data used in creating this table were from law enforcement agencies submitting 3 to 6 common months of offense reports for 2014 and 2015. If the FBI determined certain variables created unusual fluctuations in the data, those data were excluded from the tabulations.

The rape figures for those agencies that changed from reporting rape under the legacy definition in 2014 to the UCR revised definition of rape in 2015 are not included in this table. Because the UCR Program has not received two consecutive years of data for rape (legacy definition) or two consecutive years of data for rape (revised definition), the national UCR Program cannot provide a 2-year rape comparison for these agencies.

Because rape data reported by all agencies for 2014 and 2015 cannot be aggregated for reasons noted above, the percent changes from one year to the next are calculated with fewer agencies than in recent years. Offenses with fewer counts are often sensitive to minor differences when calculating trends.

Regions

The U.S. Census Bureau has established the four regions of the United States, which are used by the UCR Program in compiling the nation's crime data. The following table lists the 50 states and the District of Columbia arranged according to the regions of the United States.

NORTHEASTERN REGION

Connecticut

Maine

Massachusetts

New Hampshire

Rhode Island

Vermont

New Jersey

New York

Pennsylvania

MIDWESTERN REGION

Illinois

Indiana

Michigan

Ohio

Wisconsin

Iowa

Kansas

Minnesota

Missouri

Nebraska

North Dakota

South Dakota

SOUTHERN REGION

Delaware

District of Columbia

Florida

Georgia

Maryland

North Carolina

South Carolina

Virginia

West Virginia

Alabama

Kentucky

Mississippi

Tennessee

Arkansas

Louisiana

Oklahoma

Texas

WESTERN REGION

Arizona

Colorado

Idaho

Montana

Nevada

New Mexico

Utah

Wyoming

Alaska

California

Hawaii

Oregon

Washington
