

## Data Declaration

### Table 18

#### **Rate: Number of Crimes per 100,000 Inhabitants by Metropolitan and Nonmetropolitan Counties by Population Group, 2018**

The FBI collects these data through the Uniform Crime Reporting (UCR) Program.

#### **Important note about rape data**

In 2013, the FBI's UCR Program initiated the collection of rape data under a revised definition within the Summary Reporting System. The term "forcible" was removed from the offense name, and the definition was changed to "penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim."

In 2016, the FBI Director approved the recommendation to discontinue the reporting of rape data using the UCR legacy definition beginning in 2017.

#### **General comments**

- This table provides the rate per 100,000 inhabitants and the number of offenses known to law enforcement for violent crimes (murder and nonnegligent manslaughter, rape, robbery, and aggravated assault) and property crimes (burglary, larceny-theft, and motor vehicle theft) for metropolitan and nonmetropolitan county law enforcement agencies submitting 12 months of complete data for 2018. In addition, the table furnishes the number of agencies meeting the criteria for inclusion in this table and provides the estimated population for each population group.
- Metropolitan counties include sheriffs' offices and county law enforcement agencies associated with a Metropolitan Statistical Area (MSA).
- Nonmetropolitan counties include sheriffs' offices and county law enforcement agencies that are not associated with an MSA.

- The UCR Program does not have sufficient data to publish arson offenses in this table. Information about arson can be found in Arson Tables 1 and 2.

### **Methodology**

- The data used in creating this table were from all law enforcement agencies submitting 12 months of complete data (except arson) for 2018.
- Rape data reported by agencies using the UCR legacy definition are not included in this table.
- The FBI derived the offense rates by first dividing the aggregated offense counts by the aggregated populations covered by contributing agencies for which 12 months of complete data were supplied and then multiplying the resulting figure by 100,000.
- The rape rates were calculated using the population of the agencies reporting rape using the revised definition of rape. See table below.

<b>Populations used to calculate rape rates by Metropolitan and Nonmetropolitan Counties<sup>1</sup> By Population Group, 2018</b>			
	<b>Population Group</b>	<b>Agency count and population (based on revised rape data)</b>	
		<b>Agency count</b>	<b>Population</b>
<b>Metropolitan Counties</b>	100,000 and over	152	41,217,317
	25,000 to 99,999	396	20,510,491
	Under 25,000	1,296	4,429,185
<b>Nonmetropolitan Counties</b>	100,000 and over	223	8,924,076
	25,000 to 99,999	494	7,987,002
	Under 25,000	1,428	3,601,207

<sup>1</sup> Metropolitan counties include sheriffs' offices and county law enforcement agencies associated with a Metropolitan Statistical Area. Nonmetropolitan counties include sheriffs' offices and county law enforcement agencies that are not associated with a Metropolitan Statistical Area. The offenses from state police agencies are not included in this table.

### **Population groups**

The UCR Program uses the following population group designations:

<b>Population Group</b>	<b>Political Label</b>	<b>Population Range</b>
I	City	250,000 and more

II	City	100,000 to 249,999
III	City	50,000 to 99,999
IV	City	25,000 to 49,999
V	City	10,000 to 24,999
VI <sup>1, 2</sup>	City	Less than 10,000
VIII (Nonmetropolitan County) <sup>2</sup>	County	N/A
IX (Metropolitan County) <sup>2</sup>	County	N/A

<sup>1</sup>Includes universities and colleges to which no population is attributed.

<sup>2</sup>Includes state police to which no population is attributed.

### **Population estimation**

For the 2018 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2010 decennial population counts and 2011 through 2017 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2017 Census population estimate to derive the agency's 2018 population estimate.
