### FBI Releases 2014 Hate Crime Statistics

Washington, D.C.—Today the FBI released *Hate Crime Statistics, 2014*, the Uniform Crime Reporting (UCR) Program’s latest compilation about bias-motivated incidents throughout the nation. Submitted by 15,494 law enforcement agencies, the data provide information about the offenses, victims, offenders, and locations of hate crimes; however, the UCR Program does not estimate offenses for the jurisdictions of agencies that do not submit reports. Highlights of *Hate Crime Statistics, 2014*, follow.

- Law enforcement agencies submitted incident reports involving 5,479 criminal incidents and 6,418 offenses as being motivated by bias toward race, gender, gender identity, religion, disability, sexual orientation, and ethnicity in 2014.
- There were 5,462 single-bias incidents involving 6,681 victims. A percent distribution of victims by bias type showed that 48.3 percent of victims were targeted because of the offenders’ racial bias, 18.7 percent were victimized because of the offenders’ sexual-orientation bias, 17.1 percent were targeted because of the offenders’ religious bias, and 12.3 percent were victimized due to ethnicity bias. Victims targeted because of the offenders’ bias against gender identity accounted for 1.6 percent of victims of single-bias incidents; disabilities, 1.4 percent; and gender, 0.6 percent.
- There were 17 multiple-bias hate crime incidents involving 46 victims.
- Of the 4,048 hate crime offenses classified as crimes against persons in 2014, intimidation accounted for 43.1 percent, simple assault accounted for 37.4 percent, and aggravated assault for 19.0 percent. Four murders and 9 rapes (all 9 from agencies that collected data using the revised rape definition) were reported as hate crimes.
  - Beginning with the 2013 data collection, the UCR Program’s revised definition of rape is “Penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim.” (This includes the offenses of rape, sodomy, and sexual assault with an object as converted from data submitted via the National Incident-Based Reporting System [i.e., NIBRS].)
  - The UCR Program’s legacy definition of rape is “The carnal knowledge of a female forcibly and against her will.”
- There were 2,317 hate crime offenses classified as crimes against property. The majority of these (73.1 percent) were acts of destruction/damage/vandalism. Robbery,

burglary, larceny-theft, motor vehicle theft, arson, and other offenses accounted for the remaining 26.9 percent of crimes against property.

- In the UCR Program, the term *known offender* does not imply that the suspect's identity is known; rather, the term indicates that some aspect of the suspect was identified, thus distinguishing the suspect from an unknown offender. Law enforcement agencies specify the number of offenders and, when possible, the race of the offender or offenders as a group. Beginning in 2013, law enforcement officers could also report whether suspects were juveniles or adults, as well as the suspect's ethnicity when possible.
  - Of the 5,192 known offenders, 52.0 percent were White, and 23.2 percent were Black or African American. The race was unknown for 16.0 percent. Other races accounted for the remaining known offenders: 1.1 percent were American Indian or Alaska Native; 0.8 percent were Asian; less than 0.1 percent were Native Hawaiian or Other Pacific Islander; and 6.9 percent were of a group of multiple races.
  - Of the 1,875 offenders for whom ages were known, 81.0 percent were 18 years of age or older.
  - Of the 975 offenders for whom ethnicity was reported, 47.6 percent were Not Hispanic or Latino, 6.5 percent were Hispanic or Latino, and 1.7 percent were in a group of multiple ethnicities. Ethnicity was unknown for 44.2 percent of these offenders.
- Most hate crime incidents (31.6 percent) occurred in or near residences/homes. Nearly 18 percent (17.8) occurred on highways/roads/alleys/streets/sidewalks; 8.6 percent occurred at schools/colleges; 6.3 percent happened at parking/drop lots/garages; and 3.6 percent took place in churches/synagogues/temples/mosques. The location was considered other/unknown for 11.9 percent of hate crime incidents. The remainder of hate crime incidents took place at other specified or multiple locations.

***Hate Crime Statistics, 2014*, is available exclusively on the FBI's Web site at [www.fbi.gov/about-us/cjis/ucr/ucr](http://www.fbi.gov/about-us/cjis/ucr/ucr).**
