

Offenders

Law enforcement agencies that reported hate crime data to the Uniform Crime Reporting (UCR) Program identified 5,192 known offenders in 5,479 bias-motivated incidents in 2014. In the UCR Program, the term *known offender* does not imply that the suspect's identity is known; rather, the term indicates that some aspect of the suspect was identified, thus distinguishing the suspect from an unknown offender. Law enforcement agencies specify the number of offenders and, when possible, the race, ethnicity, and age of the offender or offenders as a group.

In 2013, the national UCR Program began collecting revised race and ethnicity data in accordance with a directive from the U.S. Government's Office of Management and Budget. The race categories were expanded from four (White, Black, American Indian or Alaska Native, and Asian or Other Pacific Islander) to five (White, Black or African American, American Indian or Alaska Native, Asian, and Native Hawaiian or Other Pacific Islander). The ethnicity categories changed from "Hispanic" and "Non-Hispanic" to "Hispanic or Latino" and "Not Hispanic or Latino." (See the Methodology for more information about this program change as well as others.)
