

## Data Declaration

### Table 11

#### Offenses, Offense Type, by Participating State, 2015

The FBI collects these data through the Uniform Crime Reporting (UCR) Program's Hate Crime Statistics Program.

#### Important note about rape data

In 2013, the UCR Program initiated the collection of rape data under a revised definition and removed the term "forcible" from the offense name. The UCR Program now defines rape as follows:

Rape (revised definition): Penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim. (This includes the offenses of rape, sodomy, and sexual assault with an object as converted from data submitted via the National Incident-Based Reporting System [NIBRS].)

Rape (legacy definition): The carnal knowledge of a female forcibly and against her will.

The offenses of fondling, incest, and statutory rape are included in the crimes against persons, *other* category.

#### General comments

- This table presents the number of offenses distributed by the offense type and reporting state.
- The Hate Crime Statistics Program collects details about an offender's bias motivation associated with 13 offense types already being reported to the UCR Program: murder and nonnegligent manslaughter, rape (revised and legacy definitions), aggravated assault, simple assault, intimidation, human trafficking—commercial sex acts, and human trafficking—involuntary servitude (*crimes against persons*); and robbery, burglary, larceny-theft, motor vehicle theft, arson,

and destruction/damage/vandalism (*crimes against property*). The law enforcement agencies that participate in the UCR Program via NIBRS collect data about additional offenses for crimes against persons and crimes against property. These data appear in *Hate Crime Statistics* in the category of *other*. Law enforcement agencies that submit their data via NIBRS also collect hate crime data about drug or narcotic offenses, gambling offenses, prostitution offenses, and weapon law violations, which are published in the category *crimes against society*.

- Hawaii does not participate in the Hate Crime Statistics Program.

### **Caution to users**

Valid assessments about crime, including hate crime, are possible only with careful study and analysis of the various conditions affecting each local law enforcement jurisdiction. (See *Uniform Crime Reporting Statistics: Their Proper Use*.) In addition, some data in this publication may not be comparable to those in prior editions of *Hate Crime Statistics* because of differing levels of participation from year to year. Therefore, the reader is cautioned against making simplistic comparisons between the statistical data of this program and that of others with differing methodologies or even comparing individual reporting units solely on the basis of their agency type.

### **Methodology**

- The data used in creating this table were from all law enforcement agencies that submitted either of the following: (1) at least one *Group A Incident Report*, a *Group B Arrest Report*, or a *Zero Report* for at least 1 month of the calendar year via NIBRS; or (2) at least one *Hate Crime Incident Report* and/or a *Zero Report* via the *Hate Crime Technical Specification* or the Microsoft Excel Workbook Tool. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months (or 4 quarters) of the calendar year.
- Beginning in 2013, all law enforcement agencies that submitted hate crime data to the UCR Program could report human trafficking offenses. However, no human trafficking offenses with a bias motivation were reported during 2015.
