

## Data Declaration

### Table 6

#### Offenses, Victim Type, by Offense Type, 2017

The FBI collects these data through the Uniform Crime Reporting (UCR) Program's Hate Crime Statistics Program.

#### General comments

- This table presents the number of hate crime offenses distributed by victim type and offense type.
- The Hate Crime Statistics Program collects details about an offender's bias motivation associated with 13 offense types already being reported to the UCR Program: murder and nonnegligent manslaughter, rape, aggravated assault, simple assault, intimidation, human trafficking—commercial sex acts, and human trafficking—involuntary servitude (*crimes against persons*); and robbery, burglary, larceny-theft, motor vehicle theft, arson, and destruction/damage/vandalism (*crimes against property*). The law enforcement agencies that participate in the UCR Program via the National Incident-Based Reporting System (NIBRS) collect data about additional offenses for crimes against persons and crimes against property. These data appear in *Hate Crime Statistics* in the category of *other*. Law enforcement agencies that submit their data via NIBRS also collect hate crime data about drug or narcotic offenses, gambling offenses, prostitution offenses, weapon law violations, and animal cruelty offenses, which are published in the category *crimes against society*.
- In the Hate Crime Statistics Program, the victim of a hate crime may be an individual, a business/financial institution, a government entity, a religious organization, or society/public as a whole.
- The victim type *society/public* is collected only in NIBRS.

- The number of 2017 hate crime incidents for the state of Utah were over-reported because several Utah agencies incorrectly reported their hate crime numbers. This was discovered after the hate crime tables had been built. Consequently, the FBI was unable to make the necessary corrections in the *Hate Crime Statistics, 2017*, publication. However, the corrected data will appear on the Crime Data Explorer at a later date.

## **Methodology**

The data used in creating this table were from all law enforcement agencies submitting one or more hate crime incidents for at least 1 month of the calendar year. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months (or 4 quarters) of the calendar year.
