

Data Declaration

Table 8

Incidents, Victim Type, by Bias Motivation, 2018

The FBI collects these data through the Uniform Crime Reporting Program's Hate Crime Statistics Program.

General comments

- This table presents the number of hate crime incidents distributed by victim type and bias motivation. Federal (FBI) hate crime data are also included.
- The Hate Crime Statistics Program collects data about both single-bias and multiple-bias hate crimes. A *single-bias incident* is defined as an incident in which one or more offense types are motivated by the same bias. A *multiple-bias incident* is defined as an incident in which one or more offense types are motivated by two or more biases.
- In the Hate Crime Statistics Program, the victim of a hate crime may be an individual, a business/financial institution, a government entity, a religious organization, or society/public as a whole.

Methodology

The data used in creating this table were from all law enforcement agencies submitting one or more hate crime incidents for at least 1 month of the calendar year. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months (or 4 quarters) of the calendar year.
