

Data Declaration

Table 5

Offenses, Known Offender's Race and Ethnicity, by Bias Motivation, 2019

The FBI collects these data through the Uniform Crime Reporting Program's Hate Crime Statistics Program.

General comments

- This table presents the number of hate crime offenses distributed by the known offender's race, ethnicity, and bias motivation. Federal hate crime data are also included.
- The Hate Crime Statistics Program collects data about both single-bias and multiple-bias hate crimes. A *single-bias incident* is defined as an incident in which one or more offense types are motivated by the same bias. A *multiple-bias incident* is defined as an incident in which one or more offense types are motivated by two or more biases.
- The term *known offender* does not imply the suspect's identity is known; rather, the term indicates some aspect of the suspect was identified, thus distinguishing the suspect from an unknown offender.
- The total number of offenses by the known offender's ethnicity is not equal to the total number of offenses by the known offender's race because not all agencies that submit offender race data also submit offender ethnicity data.

Methodology

The data used in creating this table were from all law enforcement agencies submitting one or more hate crime incidents for at least one month of the calendar year. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months (or four quarters) of the calendar year.
