

## Data Declaration

### Victims Sex by Offense Category, 2011

The FBI collects these data through the FBI UCR Program's NIBRS.

#### General Comment

This table shows the sex of the victim by the offense category to which they were connected.

#### Methodology

This table uses the following rules and then aggregates the data by the sex of the victims and offense category:

- Victims – count one for each victim, i.e., Victim Segment, where Data Element 25 (Type of Victim) is I = Individual or L = Law Enforcement Officer for each offense type to which they were connected via Data Element 24 (Victim Connected to UCR Offense Code); in a multiple-offense incident, count a victim for each connected offense type.
- Sex – determine sex by the data value in Data Element 27 (Sex of Victim).
