Data Declaration

Victims
Age Category
by Offense Category, 2013

The FBI collects these data through the FBI UCR Program's NIBRS.

General Comment

This table shows the age category of the victim by the offense category to which they were connected.

Methodology

This table uses the following rules and then aggregates the data by the age category of the victims and offense category:

- Victims – count one for each victim, i.e., Victim Segment, where Data Element 25 (Type of Victim) is I = Individual or L = Law Enforcement Officer for each offense type to which they were connected via Data Element 24 (Victim Connected to UCR Offense Code); in a multiple-offense incident, count a victim for each connected offense type.

- Age Category – for this table, an Adult is a victim who is age 18 or older and a Juvenile is a victim who is under 18 years of age. The Unknown column represents the number of victims where the victim's age was unknown.
